Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: Distance learning (DL) is education's gold rush. Many adults need convenience if they are to initiate or finish **college** degrees. The article, focusing on distance learning and the **Internet**, is divided into three sections. The first section consists of an introduction to the world of DL **on - line** and includes a four-step road map of success for DL **students**. The steps are: self-education about DL issues; defining personal, career, education, and financial needs; choosing a DL program; and finding and keeping DL resources and support. The second section deals with the nine different DL applications found on the **Internet**, the international computer **network** with over 50 million users. These include: DL Newsgroup discussions; World Wide **Web** DL **information** home pages; **financial aid Web** sites; DL **university** home pages on the **Web**; electronic mailing lists and listservs, E-mail resources; **on - line** services; tutoring **on - line**; and MOOs (Mud Oriented Object) known as "virtual classrooms." The final section contains a bibliography of useful DL books, journals, and software catalogs for **people** who are interested in learning more about DL. (9 Refs)

Title: High- school district sets up school -to-home network

Author(s): Markoff, J.

Journal: InfoWorld vol.5, no.11 p.17-18

Publication Date: 14 March 1983 Country of Publication: USA

CODEN: INWODU ISSN: 0199-6649

Language: English Document Type: Journal Paper (JP)

Treatment: Applications (A)

Abstract: The Mountain View-Los Altos High **School** District located in

the heart of Silicon Valley installed a microcomputer system that allows **students** to communicate with their counselors and teachers using a home computer. The experimental project is designed initially to aid the **school** district's counseling staff, which will use a central microcomputer to store **student** records and to develop and change **student** schedules. Initially the computer will contain **student** transcript information, a master class schedule and enrollments and attendance records. Counselors will register **students** directly by computer and avoid the problem of assigning **students** to classes that are already full. The system will then be made available to parents of **students**. They will be able to connect to the system by modem to obtain academic counseling information of interest to their children. A menu of available options will consist of **information** on **colleges**, graduation requirements, **financial - aid** scholarships and career guidance. (0 Refs)

ONLINE **STUDENT SERVICES IN AMERICAN HIGHER EDUCATION: CONTEMPORARY ISSUES AND FUTURE IMPLICATIONS (STUDENT SERVICES)**

Author: MCRAE, MARY SUZANNE

Degree: PH.D.

Year: 1999

Corporate Source/Institution: UNIVERSITY OF NORTH TEXAS (0158)

Adviser: BARRY LUMSDEN

Source: VOLUME 60/05-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1475. 106 PAGES

Descriptors: EDUCATION, HIGHER ; EDUCATION, ADMINISTRATION ; EDUCATION, TECHNOLOGY

Descriptor Codes: 0745; 0514; 0710

Providing **student** services in the **online** environment presents both challenges and opportunities for administrators in American higher education. In today's competitive higher education market, **students** are enticed and encouraged in a variety of ways to apply to and enroll in **colleges** and **universities**. Technology plays an important role in the ways in which **students** perceive institutions of higher learning. **College** and **university Web** sites need readily available information and services to present to prospective and currently enrolled **students**.

This study examined the way in which the top 100 "most wired" **colleges** and **universities** provide **online student** services. Named by a national publication in May 1998, these **colleges** and **universities** were chosen because of their technological infrastructure, courses offered **online**, public computers on campus, and **online student** services, among other aspects. These 100 **schools** were then examined

using the Southern Association of **Colleges and Schools** <italic> Criteria for Accreditation</italic> **student** development services. Among the services examined were counseling, career services, **student** activities, **student** behavior (discipline, judicial affairs), **financial aid**, and health **services**. Each of the 100 **college** and **university Web** sites was examined to determine the nature and extent of **student** services offered **online**.

The highest percentage of services offered **online** were in career **services** and **financial aid** and the least **service** offered **online** was in the area of **student** behavior. Most of the top 100 "most wired" **colleges** and **universities** offered information **online** regarding **student** services in text format. Research in the area of **online student** services is not readily available, and this study is timely for administrators and practitioners facing the challenge of providing **online student** services.

01649363 ORDER NO: AAD98-37533

CHINESE GRADUATE STUDENTS ' PERCEPTION OF THEIR ADJUSTMENT EXPERIENCES AT THE UNIVERSITY OF PITTSBURGH (PENNSYLVANIA)

Author: LIN, LIN

Degree: PH.D.

Year: 1998

Corporate Source/Institution: UNIVERSITY OF PITTSBURGH (0178)

Adviser: JOHN C. WEIDMAN

Source: VOLUME 59/06-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1938. 202 PAGES

Descriptors: EDUCATION, HIGHER ; EDUCATION, SOCIOLOGY OF ; EDUCATION, BILINGUAL AND MULTICULTURAL ; SOCIOLOGY, ETHNIC AND RACIAL STUDIES

Descriptor Codes: 0745; 0340; 0282; 0631

The purpose of this study was to investigate Chinese graduate **students** ' perception of their adjustment experiences at the **University** of Pittsburgh (Pitt). This was a qualitative study, with open-ended interviews and narrative stories as data sources. Altogether, 30 Chinese **students** have participated in this study. Attention was paid to differences by gender, academic major, length of stay, age and marital status. The results were presented in narrative form.

The major findings of this study were: (1) Chinese graduate **students** perceived the following as their adjustment problems at Pitt: (a) academic adjustment problems, which included language problems, problems due to differences between the educational systems of China and the United States, problems concerning curriculum/program relevance, problems in completing **school** work, problems in interacting with classmates, problems in interacting with professors, and problems due to change of academic majors; and (b) socio-cultural adjustment problems, which included language problems, financial problems, cultural segregation, racial discrimination, food problems, health problems, housing problems, transportation problems, international **student** advisement problems, security problems, marital/dating problems, religious problems, tax problems, insurance problems, and shopping problems. (2) Chinese graduate **students** ' coping behavior at Pitt included ten sources of help: (a) self; (b) professors; (c) Chinese friends; (d) Chinese **student** organizations; (e) Americans in general; (f) other international **students** ; (g) family; (h) church; (i) Office of International Services (OIS); and (j) **internet**. And two general

attitudes also showed up: (a) active participation/approach; and (b) passive escape/acceptance. (3) Chinese graduate **students** at Pitt differentiated the impact of their previous Chinese background on their adjustment into two aspects: (a) the academic/professional aspect; and (b) the socio-cultural aspect. Most of them considered that their previous academic/professional background in China has contributed to their adjustment here. With regard to the impact of their Chinese socio-cultural background on their adjustment, Chinese **students** had two basic attitudes: (a) emphasizing the gap between the socio-cultural systems of China and the United States and considering that their Chinese socio-cultural background has hindered their adjustment here; and (b) admitting the gap between the socio-cultural systems of the two countries but believing that their sophisticated Chinese socio-cultural background has contributed to their adjustment here. (4) Lysgaard's (1955) U-Curve theory did not apply to Chinese graduate **students** ' adjustment process at Pitt because, in general, their adjustment process followed an upward line. (5) Chinese graduate **students** ' suggestions for Pitt to help facilitate their adjustment included the following aspects: (a) about the Office of International **Services** (OIS); (b) about **financial aid** ; (c) about professors; (d) about the library; (e) about the language program; (f) about providing more opportunities for social contact; (g) about housing; (h) about food; (i) about support services; (j) about support for academic research; (k) about orientation and advisement; and (l) some miscellaneous suggestions.

AN INVESTIGATION OF ADMINISTRATORS' PERCEPTIONS OF ENROLLMENT MANAGEMENT AT PUBLIC COLLEGES AND UNIVERSITIES IN WEST VIRGINIA

Author: FULLER, JOHN LEWIS

Degree: PH.D.

Year: 1998

Corporate Source/Institution: KENT STATE UNIVERSITY (0101)

Co-directors: FERGUSON B. MEADOWS, JR.; STEVE OLU MICHAEL

Source: VOLUME 59/06-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1933. 242 PAGES

Descriptors: EDUCATION, HIGHER ; EDUCATION, ADMINISTRATION

Descriptor Codes: 0745; 0514

In the state of West Virginia it is anticipated that the number of high **school** graduates will decline by 17 percent through the year 2007-8. An increase in the number of public **school students** is not expected until the year 2006. Additionally the **college** going rate in the state is low at 36 percent. These factors were instrumental in developing the interest in researching enrollment management at the public higher **educational institutions** in the State of West Virginia. The purpose of this research was to further the research on enrollment management by examining the enrollment management function at public **colleges** and **universities** in the state of West Virginia.

The study included a description of what are the perceptions of presidents, vice presidents for academic affairs, vice presidents for **student** affairs, and directors of admissions in regard to (a) available, needed, and effective enrollment management activities for recruiting and retaining **students** ; (b) organizational structures for implementing an enrollment management model; and (c) a description of any differences among the groups in regard to enrollment management activities.

Data for the study were collected with a questionnaire developed by Webber (1988) and modified by the researcher. The instrument was designed to obtain data relative to the availability, need, and effectiveness of specific enrollment management elements, and the model; and data relative to perceptions of organizational structures. The questionnaire was sent to 54 key administrators at West Virginia public undergraduate institutions. There were 42 responses for a return rate of 77 percent. The data were reported as numbers, percentages, and analysis of variance.

The enrollment management elements examined were; marketing, recruiting, academic advising, career planning and placement, academic assistance, institutional research, orientation, pricing and **financial aid**, retention, and **student services**. The activities within each element were generally perceived by key administrators as available, needed, and effective with exceptions. The elements as a whole were perceived to be available, needed, and effective. There were some differences among the groups for perceived available and needed enrollment management activities within the enrollment management elements. There were perceived differences among the groups for effective enrollment management elements with significant differences reported from the academic affairs group. Also the preferred enrollment management organizational structure was the staff coordinator (Director of Enrollment Management) model.

A comparison of the Web sites of selected Southeastern business schools

Bradbard, David A; Voican, Ana V

Journal of Educational Technology Systems , September 1, 1999 , v27 n3
p259-277, 19 Page(s)

ISSN: 0047-2395

Languages: English

Document Type: Articles, News & Columns

Geographic Location: United States

Presents the results of a study examining the **Web** sites of 37 business **schools** in the Southeastern U.S. Explains that the sites were compared with one another and then were compared with highly ranked business **school**

Web sites. Adds that the sites were also compared with **Web** sites of the academically top-ranked business **schools** defined by recent surveys from U.S. News and World Report. Describes the importance of the **Web** for academic institutions. Reviews existing articles and studies. Discusses the methodology used, and the limitations and contributions of the study. Observes that the Southeastern **schools** ' **Web** sites have several innovative features, such as **online** monitoring of the application process, **online** book and supply ordering, a virtual reality tour of the campus, and secured sites with **financial aid information** and **online** grades and transcripts. Includes seven tables and one list of references.

College and career planning: www resources

Chapman, Linda; DiBianco, Phyllis

MultiMedia Schools , November 1, 1998 , v5 n5 p30-34, 5 Page(s)

ISSN: 1075-0479

Languages: English

Document Type: Articles, News & Columns

Geographic Location: United States

Offers an update on **Web** sites that, it says, offer free, reliable information regarding **colleges** and careers for high **school students** . Suggests that **students** work with guidance counselors to narrow and personalize resources found, since the number of available sites has grown explosively in the past two years. Provides thumbnail summaries of nine projects that leverage **student** interest in **college** and career planning sites to strengthen research, critical thinking, and writing skills. Topics covered by the projects include electronic mail, advanced placement tests, specific **college** campus information, and job-related math skills. Also lists 30 **Web** sites with URLs and thumbnail content summaries, covering general information, finding a **college** , **school** home pages and newspapers, **financial aid information** , applying to **college online** , career development, and guidance counselor resources. Includes one table. (JC)

FinAid and fastWEB - two for the money!

Nance-Mitchell, Veronica

Online , January 1, 1998 , v22 n1 p72-73, 2 Page(s)

ISSN: 0146-5422

URL: <http://www.finaid.org> <http://www.fastweb.com>

Product Name: FinAid; FastWEB

Languages: English

Document Type: Software Review

Geographic Location: United States

Presents favorable reviews of FinAid (free) and fastWEB (free), two **Web** sites devoted to **information** on **student financial aid** . Says that FinAid is sponsored by the National Association of **Student Financial Aid** Administrators. Says that its links are constantly updated and that it includes **information** on **financial aid** scams. However, says it lacks the capability to limit searches. Explains that fastWEB contains an **online** database of over 275,000 private sector scholarships, loans, and grants. Adds that it uses a detailed personal profile to match the user's qualifications to the available funds, and that it generates form letters useful for requesting more information. However, considers the personal profile creation process exceedingly lengthy. Considers both sites good starting points. Includes three screen displays. (MKS)

Detailed Description

... have a positive experience in college.

[00051 There are several websites that generate lists of **schools** according to preferences entered by **students**. For example, at embark.com, which recently merged with the Princeton Review, a **student** is asked to answer approximately seventeen questions. Some examples of the questions asked are: "What annual out-of-state tuition levels are you interested in?" "Are you interested in **schools** based on the percentage of undergraduates who receive **financial aid**?" "What percentage of **applicants** accepted interests you?" "Are you interested in **schools** based on the racial and ethnic diversity of the **student** body?" "What activities interest you?" "How important to you is a fraternity or sorority presence on campus?" Similarly, at petersons.com, **students** are asked about ten questions, including questions, such as their preference for faculty/ **student** ratio and religious denomination.

[00061 However, such surveys can be cumbersome and time-consuming.

Detailed Description

Claims

English Abstract

The invention provides a system (100) and method for providing access to **financial aid** products from a central location via the **Internet** (106). The system (100) comprises a computer **network**, at least one server in communication with the computer **network**, and at least one product access **Web Site** (104) linked to the server through the computer **network**, the **Web Site** providing a user interface through which a first user, such a **student** (105) or a **school** representative (107), can select from among a plurality of **financial aid** products. The system also includes a sign-on module (103) that interacts with the **Web Site** and controls access to at the **financial aid** products after receiving valid login information a single time until the first user is logged...

Detailed Description

... Web-based services, and more specifically to a system and method for providing access to **financial aid** products..

BACKGROUND OF THE INVENTION

[0003] With the advent of the Internet, more and more...

...educational and financial institutions, are working together more to provide solutions to customers' needs.

[0004] **Educational institutions** and financial institutions have adopted technologies to improve service to **financial aid** consumers, such as **students**, potential **students**, and their families. For example, both educational and financial institutions may offer **on - line** information about financing a **college** or graduate education. Additionally, financial institutions may offer **on - line** forms for **student**

I loan applications. **Financial aid** consumers, however,, may still be required to meet their **financial aid** need from a variety of locations.

[0005] For example, a student may fill out an...

...federal student aid (FAFSA), entering a variety of demographic information.

Subsequently, the student receives a **financial aid** award package, which includes a **student** loan, in the mail. The **student** may then be required to visit their **school** 's **financial aid** office to receive loan counseling. After receiving the loan counseling, the **student** may then have to complete a **student** loan application **on - line** , which again requires entering much of the same demographic information previously entered for the FAFSA. Accordingly, the **financial aid** process may be cumbersome, inconvenient, and inefficient.

[0006] Although portions of the process for obtaining...

...a need for a system and method to provide secure student loan processing and other **financial aid** products for **students** and their families that is completely **Internet** -based.

BRIEF SUMMARY OF THE INVENTION

[0007] The invention provides a system and method which allows users', **financial aid** professionals and **students** , to interact and to access **financial aid** products from a central location via the **Internet** . Briefly described, the system comprises a computer **network** , at least one server in communication with the computer **network** , and at least one product access **Web** Site linked to the server through the computer **network** , the **Web** Site providing a user interface through which a first user can select from among a plurality of **financial aid** products. The system also includes a sign-on module that interacts with the **Web** Site and controls access to the **financial aid** products, wherein the sign-on module can provide access

2

to the **financial aid** products after receiving valid login information a single time until the first user is logged...

...access **Web** Site will be a student or a person employed in a school's **financial aid** office (FAO). A typical user of the Site editor module will be a **school** representative, and more specifically a representative of the **school** 's FAO. A typical user of the management module will be a representative of the...

...more specifically, a representative of a financial institution engaged in the business of providing educational **financial aid** . A user accesses the system using a computer, which is referred to as a "client ...

...according to an exemplary embodiment of the invention. The system 100 allows users, for example, **financial aid** professionals and **students** , to interact with and have access to **financial aid** products from a central location via the **Internet** 106. The system 100 offers access to products that provide complete **on - line student** loan processing, as well as additional **financial aid** and other products to a user 105 of a product access **Web** Site 104 located in the system 100. A **financial aid** product may be any information, service) or product related to the **financial aid** process, such as loan counseling services, applications for **financial aid** or loans, services for consolidating loans, among many others. Other products (or services or information) may be directed at the ancillary needs of **students** , such as general financial products, e.g. credit card products, and career related products, among others. Products may be located on different **Web** Sites within the system or external to the system (FIG. 28).

[0027] The system 100...

...with the ability to create a product access

5

Web Site 104 tailored to the **financial aid** needs of **Web Site** users 1051, such as the **school 's students** and/or FAO. Using the Site editor module 101, a **school** representative 107 can create a **Web Site** 104 that provides **Web Site** users 105 access to any number of products available through the system. For purposes of this detailed description, a **Web Site** is an **individual** set of **Web Pages** that may be visited by a **Web Browser**. A product access **Web Site** 104 created using the Site editor module 101 is located on a system server...

...Therefore, if the student 105 is awarded a student loan as part of his/her **financial aid** package, the **student** 105 applies for their **student** loan using a **student** loan product and completes required entrance counseling using an entrance counseling product without having to...

...the system 100, the student 105 may complete his/her student loan process and access **financial aid** and other products from a central location via the **Internet** to meet his/her **financial aid** needs efficiently and conveniently.

7

[0033] Aspects of the invention, including the Site editor module...

...more product access **Web Sites** tailored to provide a product access **Web Site** user with **financial aid** products and other products. Further, a user can create a **Web Site** tailored to a particular type of product access **Web Site** user. For example, a **school** representative can create a **Web Site** tailored to the **school 's FAO staff** and a one or more Sites tailored to the **school 's students**. As a **school** may have different types of **students**, a user can create a **Web Site** tailored for each type of **student**. For example, a **university** representative can create a **Web Site** tailored to the needs of its undergraduate **students** and their parents, and also create **Web Sites** for each of its graduate programs tailored to the needs of its graduate **students** in those programs.

[0039] The user enters the Site editor module 101 through a login...

...preset tab. Thereby, the user can quickly and easily tailor the **Web Site** to provide **financial aid** and other products. to the product access **Web Site's** intended users. FIG. 5 is an exemplary screen view of a page of a product access **Web Site** illustrating a link 520 under the tab 421 "Calculators." The link 520 is to...

...Each link can have an associated description 521 and/or an image 522 to allow **Web Site** users to quickly understand the product(s).

[0053] In segment 203b, the user is...

Claim

States is:

1 A computer system for **financial aid**, the system comprising:
a computer **network** ;
at least one server in communication with the computer **network** ;
at least one product access **Web Site** linked to the server

through the computer **network** , the **Web** Site providing a user interface through which a first user can select from among a plurality of **financial aid** products;
a sign-on module that interacts with the **Web** Site and controls access to the **financial aid** products, wherein the sign-on module can provide access to any the **financial aid** products after receiving valid login information a single time until the first user is logged...

...the financial aid products.

12 The system of claim 11, wherein the plurality of preset **financial aid** products comprises a **student financial aid** application,
student loan application product, a **student** loan counseling product, and an electronic **financial aid** award package product.

13 The system of claim 6, wherein the Site editor module provides...

...products and receives input determining the preset financial aid products.

18 A system for educational **financial aid** service, the system comprising:
at least one server;
at least one product access **Web** Site located on the server that provides a product access user interface through which a first user can select links to a plurality of **financial aid** products;
a sign-on module that receives login information related to the first user and interacts with the at least one product access **Web** Site to control the first user's access to the plurality of **financial aid** products, wherein the sign-on module is configured such that the first user can access any one or more of the plurality of **financial aid** products after entering valid login information until the **Web** Site user is logged out of the system;

36

a Site editor module enabling a second user to create and modify a product access **Web** Site by a preset process;
a management module enabling a third user to affect the preset process.

19 A computer network for enabling **financial aid** service, the **network** comprising:

at least one server in communication with the computer **network** ;

at least one product access **Web** Site linked to the server through the computer **network** , the **Web** Site providing a user interface through which a first user can select from among a plurality of **financial aid** products;
a sign-on module that interacts with the **Web** Site and controls access to the **financial aid** products, wherein the sign-on module can provide access to the **financial aid** products after receiving valid login information a single time until a user is logged out...

...a user interface through

which a second user can create and modify a product access **Web** Site by a preset process and receives input related to the preset process.

20 The...

...Site editor module provides a user interface through which the second user can select the **financial aid** products from among a plurality of preset **financial aid** products and receives input for selecting the **financial aid** products.

27 The network of claim 26, wherein the plurality of preset **financial aid** products comprises a **student financial aid** application

38 product, **student** loan application product, a **student** loan counseling product, and an electronic **financial aid** award package product.

28 The network of claim 191, wherein the Site editor module provides...

...provides a user interface through which the third user can determine the plurality of preset **financial aid** products and receives input determining the plurality of preset **financial aid** products.

39 . A computer software program product for **financial aid** embodied on a computer useable medium, comprising:
at least one product access application that runs on a server in communication with a computer **network** that provides a user interface through which a first user can select from among a plurality of **financial aid** products;
a sign-on application that interacts with the **Web** Site and controls access to the **financial aid** products, wherein the sign-on module can provide access to the **financial aid** products after receiving valid login information a single time until a user is logged out...

...aid products.

43 The computer program product of claim 42, wherein the plurality of preset **financial aid** products comprises a **student**

41 **financial aid** application, **student** loan application product, a **student** loan counseling product, and an electronic **financial aid** award package product.

44 The computer program product of claim 38, wherein the Site editor...

...receives input determining the preset **financial aid** products.

49 A method of providing for educational **financial aid** service, the method comprising:
providing at least one product access **Web** Site located on a system server in communication with a computer **network** that provides a user interface through which a first user can select links to a plurality of **financial aid** products;

receiving input by a first user selecting one or more links;
controlling the first user's access to at least a portion of the
plurality of **financial aid** products using a sign-on module of the
system; wherein the act of controlling the...

- ...valid, enabling the first user to access
any one or more of the plurality of **financial aid** products until the
first user exits the sign-on module.
- 50. The method of claim 491, wherein the plurality **financial aid**
products are such that the first user can complete the process of
applying for and receiving **financial aid** using only the plurality of
financial aid products.
- 51. The method of claim 491, wherein the act of enabling the
first user to access any one or more of the plurality of **financial aid**
- 43
products comprises passing a credential associated with the first
user to a server hosting a **financial aid** product.
- 52 The method of claim 49, further comprising:
under control of the sign-on...
- ...interface
through which a second user can select the links to the plurality of
44
financial aid products from a plurality of preset links, and wherein
the act of receiving input comprising...
- ...second user can create at least a portion of the
links to the plurality of **financial aid** products and wherein the act
of receiving input comprising receiving input creating at least a...
- ...interface through which the
third user can determine a preset links to a plurality of **financial**
aid
products, and wherein the act of receiving input comprises
receiving input determining the preset links...

Detailed Description

Detailed Description

... search 208 includes a loan reporting function 234

which provides academic institutions with information about **students** who applied for or received loans, grants, or other **financial aid**. Requesting institutions, for example, can use this information 234 to assist in the administration of **student financial aid**.

14

Examples of the uses of this information includes: deferring Perldns loan repayments, responding to...or date of birth. A further feature of the loan reporting function 234 is receiving **financial aid** information from siblings and/or parents of the **students** 236. The information 236 is important since it provides a needs analysis contained in the **student**'s application for **financial aid**. In this example, the social security number, and the name and the date of birth of the sibling or parent for whom the institution is seeldng enrollment information for **financial aid** purposes is provided.

Detailed Description
Claims

Detailed Description

... Invention

[0002] The present invention broadly relates to the field of electronic commerce and global **network** information management services, and more specifically, to a system and method for providing an electronic marketplace in which higher **education institutions**, lenders, and loan buyers can communicate and connect to conduct business. The invention facilitates an **educational institution**'s selection of "preferred lenders," which provide **students** of the **educational institution** with **educational loans**.

The invention also facilitates transactions between financial institutions for the sale of education loan portfolios...

...time repayment, and customer service. Federally guaranteed loans are issued under the Federal Family **Education Loan** Program (FFELP). As an indication of the huge size of this market, in the year...

...that lenders will originate over \$25 billion in FFELP loans during the academic year at **colleges** and **universities** across America. Analysts expect this figure to rise to almost \$35 billion by 2004. Comparing...

...compete based on intangible factors such as level of service.

[0005] A third type of **education loan** product, not made by private lenders, is a loan issued under The William D. Ford...

...United States Department of Education (USDE) is the sole lender, generates \$13 billion in private **education loans** annually, an amount expected to increase to more than \$15 billion by 2004. Overall, almost 6 million **students** and - 2 parents receive FFELP loans, FDLP loans, and private **education loans**. By 2004, analysts expect that number to rise to 8 million.

[0006] Overall, the market for these three types of **education loan** products will undoubtedly expand. There are two trends driving **education loan** volume higher: the number of **students** and the growth rates of tuition cost relative to income. The increased recognition of the...

...higher education and the growing need to update generation will further increase the supply of **students** in post-secondary **educational institutions** (e.g., **colleges**, **universities**, vocational institutions, trade **schools**, technical **schools**, and proprietary **schools**). As for the second trend, the cost of attending **college** doubled in the 1990's, while median and disposable income rose only 50%. Demandpull pressure...

...1,000 eligible lenders participating in the FFELP and the FDLP. Other participants in the **education loan** industry include servicers, guaranty agencies, secondary mark-ets, and the USDE.

[0008] Nearly a decade...

...schools have been able to streamline their operations and assure service quality levels for their **financial aid** offices and **student** and parent **borrowers**.

[0009] Generally, schools choose four to six preferred lenders to

recommend to students. The students...

...Indeed, a lender must gain placement on a preferred lender list to generate any significant **education loan** volume at a **school**.

[0010] In the past, schools have typically chosen preferred lenders based on subjective and arbitrary...provide customized loan programs.

[0012] To obtain this customization and extract further value for their **student** and parent **borrowers**, some **educational institutions** issue requests-for-proposals (RFPs) for their **education loan** offerings. Unfortunately, this RFP process is extremely timeconsuming for the **schools** and the responding lenders. The cost and complexity of responding to RFPs and the hitherto...in the higher education secondary market use an Internet-based auction for the sale of **education loan** portfolios and forward purchase commitments. In particular, PACE enables lenders to auction existing loans and...

...of the global computer network. The offeror is, for example, a school soliciting proposals for **education loan** programs, or is a loan seller soliciting offers to buy existing or future loan volume...

...provides an e-commerce platform for the business-to-business marketing of federally guaranteed and private **education loans**. By creating an **Internet**-based exchange for the education finance marketplace, the present invention delivers a cost efficiency and...s preferred lender list (CUE), and for the business-to-business marketing and sale of **education loan** portfolios and forward purchase commitments (PACE). In an embodiment of the present invention, the electronic...

...selecting lenders for placement on a school's preferred lender list, and for sales of **education loan** portfolios and forward purchase commitments.

[0054] As shown, Figure I illustrates an auction system 1...

...an item for sale.

For example, offeror 102 could be a school soliciting proposals for **education loan** programs, or a loan seller soliciting offers to buy existing or future loan volume.

[0055]...for creating a new RFP. The RFPs solicit, from prospective lenders, proposals to furnish **education loans** to the **students** of the **school**. As an example, the RFP can set parameters for the **school**'s loan program by describing the loan program characteristics and services - including items like loan delivery methods and guarantor - that are important to the **school**. As an example, Figure 8 illustrates a graphical user interface of a template for creating...to assisting students. CUE allows schools to quickly and efficiently state their and their students' **educational loan** needs, and deal with only those lenders willing to provide loan programs and services that have cleared the **school**'s specially designed requirements.

[00109] RFPs for loan programs are generally regarded to be the...

...initiated direct mail and call campaigns and many face-to-face meetings, CUE frees school **Financial Aid** Administrators (FAAs) to spend more time working with their **students**.

[00111] CUE establishes a market-based mechanism to drive the customization

of loan programs and...contains, for example, loan portfolio or forward purchase commitment specifications, rather than requirements of an **education loan** program. In most other respects, the auction processes of CUE and PACE are essentially the...

...00124] According to an embodiment of PACE, a lender that owns or intends to originate **education loans** solicits bids online from prospective purchasers. The seller may offer either existing portfolio(s) of...

...volunie. Thus, a seller may solicit bids on the combined portfolio A+B+C, and **individually** on components A, B, and C. Likewise, a prospective purchaser may choose to submit bids...

...sellers. The system also accommodates gridbased pricing in bids since, especially in forward purchase commitments, **education loans** are often sold at differential prices based on factors such as the average **borrower** indebtedness of the portfolio and the percentage of loans in the portfolio that are serial to prior loans to the same **borrowers** .

[00125] PACE benefits loan sellers by creating a deeper market, with fuller, more efficient pricing...

Claim

... claim 1, wherein the offeror is one of a school that is soliciting proposals for **education loan** programs and a loan seller that is soliciting offers to buy one of loans and...

Detailed Description

Detailed Description

... information, such as loan
repayment information, based on the award.

2. Related Art

Many **individuals** require financial assistance in paying for an education, whether it be in the form of grants, scholarships, special employment (e.g., work-study programs), and/or loans. Many such **educational institutions** (e.g., **schools**, such as **colleges** and **universities**) provide various forms of assistance in obtaining **financial aid** for potential **students**.

Typically, **financial aid** offices at **schools** assemble financial award information including, for example, **financial aid** award packages containing monetary awards which are funded from one or more grants, scholarships, work study or teaching assistantship jobs, and/or loans. Representatives of the **financial aid** offices will often tailor these **financial aid** award packages for the potential **students** and, therefore, the awards will often be different (based on, for example, financial need, the desirability of the **student**, etc.).

The **financial aid** office will mail many (i.e., a batch or lot) **financial**

aid award packages to potential **students** with the hope that the **financial aid** award is attractive to the **student** and that the **student** will accept the award and attend the **school**. The cost for mailing many **financial aid** award packages can be substantial, for example, each package may cost approximately \$ 1 0.00 to mail to 1 000 potential **students**. Accordingly, **schools** are interested in other modes of transmitting **financial aid** award packages to their potential **students** which are less costly.

Typically, the loans which fund the **financial aid** awards include federal loans, such as Perkins and Stafford loans. The interest rates for these loans are not within the control of the **schools** or the financial institutions which issue those loans and, therefore, the **student** /parent decision on accepting a **financial aid** award package usually is influenced in other ways.

Further, the schools and financial institutions will...packages and admission after the awards are mailed.

The amount of money offered in a **financial aid** award package for a particular **student** is often dependent on a total amount of funds available to

the **school** by way of grants, scholarships, work-study, etc.

Accordingly,

when potential **students** decline **financial aid** award packages, additional funds may be available to offer to the other potential **students**, thereby positively influencing the **student** /parent decision on accepting a **financial aid** award package and attending the **school**. Thus, the **schools** are interested in obtaining a **student** /parent decision on the **financial aid** award packages as

soon as possible. Unfortunately, using current processes there may be significant delays between the time that a **student** receives a **financial aid** award package and the time that the **student** responds to the package with an acceptance or declination.

A student/parent must weigh many factors in accepting or declining a **financial aid** award package. In particular, the **student** /parent must determine whether he or she can afford to attend the **school** even if a **financial aid** award package is given. Thus, the **student** /parent must review the cost of attendance, including any direct and indirect costs, in light of the **financial aid** award package and project the net costs to the **student** /parent in meeting the unmet needs (including loan repayment schedules) for attendance. This typically involves contacting an expert (or accessing some software) who is capable of projecting costs for the **student** /parent based on input from the **student** /parent.

In working with an expert, the student/parent should consider prior school loan obligations...

...password to access a secure website. The student logs onto the website and accesses their **financial aid** award package. The **student** can choose a preferred lender if a loan is awarded and input other information necessary for accepting the award. The **student** 's response to the award is reported to the **school**.

Unfortunately, the CollegeNET system suffers from several disadvantages, among others: (i) the website does not what the loan repayment obligations will be; (ii) the student/parent cannot modify the **financial aid** award package to reflect other sources of funds which would alter cost projections and/or loan repayment obligations; and (iii) the system does not provide the **student** /parent with information as to the break-out of the cost of attendance in terms of direct and indirect costs to the **student** /parent.

Sallie Mae, Nellie Mae, Educaid, and Citibank offer **on - line** websites which provide calculating functions to project costs, such as loan repayment obligations. These systems, however, are not linked with a **financial aid** award package website and, therefore, require the user to input all information necessary for obtaining...

...projection or loan repayment schedule.

Further, in addition to financial aid based on need, some **students** obtain **financial aid** based on merit, or a combination of need and merit. There is a need for users to be able to determine education

financing requirements based on merit based **financial aid** packages as well as combination packages.

Further, there is a need for users to be...

...new method and apparatus for providing students and parents with education financing information, particularly **financial aid** award packages, where the **student** /parent can: (i) easily review the **financial aid** award package; (ii) review cost projections (e.g., loan repayment information); (iii) view and select potential lenders; (iv) modify a **financial aid** award package to include, for example, other sources of funds outside the award or to ...

...a need for a method and system which can: (i) reduce the costs for a **school** to transmit **financial aid** award packages to potential **students** ; (ii) quickly modify the **financial aid** award packages based on accept/decline/postpone decisions of the **students** /parents; and (iii) provide influence on the **student** /parent decision at the time of reviewing the award package.

SUMMARY OF THE INVENTION

In...60 preferably mails a letter to a potential student 50 which contains an announcement that a **financial aid** award package has been granted to that **student** 50 and may be obtained by visiting the website on the computer **network** 20. The letter preferably contains a URL address, user name and password. Reference is now...10, Fig. 2C); (iii) a link to the policies, rules, and/or regulations for **financial aid** may be activated (step 232); (iv) a link to **financial aid** eligibility requirements may be activated (step 234); (v) a link to information about the **school** may be activated (step 240); (vi) a link to - 12 security information about the website may be activated (step 244); and (vii) a link to additional information about the **school** , such as promotional material, may be activated (step 246).

Area 308 (Fig. 3B) preferably provides a series of icons which may be activated by the **student** /parent 50 to visit specific areas of the website, namely, the **home page** 308A, the award package information 308B, package history 308C, help 308D, and the log-out...

...a resource area 320 preferably includes a plurality of additional links, to the instructions, the **financial aid** policies, the **financial aid** eligibility requirements, a glossary, and a cost projection calculator (financial planning tools).
With reference to...

...valid Institutional Student Information

Report (ISIR) is on file (step 210) and a **financial aid** award is outstanding (step 212), the **student** /parent 50 may activate the award package icon 308B (Fig. 3B) or activate the "Go to My Award Package" link at area 318 to view his or her **financial aid** award package (step 214, Fig. 2Q). Alternatively, if the **student** /parent 50 has already accepted a **financial aid** award package, then at step 212 the process flow would continue to step 216 where...

...reference to Fig. 3C, a schematic representation of an electronic screen suitable for presenting the **financial aid** award package to the student /parent 50 is illustrated. The electronic screen includes an area 322 which contains the details of the **financial aid** award package. Area 322 preferably includes details on the sources of the funds for the...

...the grants 322A, scholarships 322B, jobs 322C and loans 322D, are shown for at least **individual school** terms, **school** years, and totals for the **school** year 322E. Subtotals for the grants, scholarships, jobs, and loans are also preferably provided. At...

...is provided which indicates the amount of award money which may be utilized by the **student** 50 to attend the **school** for the entire **school** year.

The screen shown in Fig. 3C also preferably includes additional information, not shown in...unmet need 341 and result in a remaining unmet need.

Preferably, the cost of attendance, **financial aid** package information, and cost projection results are presented in terms of a particular time period, such as a **school** term or a **school** year. Fig. 3D illustrates the cost projection information on a yearly basis, namely, 1999-2000...

...electronic screen of Fig. 3D which, when activated, causes data to be sent to the **student** /parent 50 for presenting an electronic screen which is suitable for calculating loan repayments (step...

...repayment calculator and/or a disclaimer. Area 344 includes the loan repayment calculator for a **student** . If a parent desires to use the loan recalculation, the parent clicks on 345 and...repayment to their particular needs. Advantageously, students/parents 50 may become better informed regarding their **financial aid** award package, particularly in terms of their responsibilities for repaying loans, and, therefore, may make a better decision as to whether the **financial aid** award package should be accepted or declined.

Preferably, area 344A may be activated by the...

...50 with a critical tool in making an informed decision regarding the acceptance of a **financial aid** award package.

Reference is again made to Fig. 3 C I and, more specifically, to...on the next button to continue the process of submitting the package decision to the **financial aid** office of the **educational institution** . If the **student** wishes to make changes, the **student** must click on the "back" button.

As shown, the electronic screen of Figs. 3H I...

...the award package. If approved, the user is presented with an electronic screen presenting the **financial aid** award package and selected lenders. Figs. 316 and 317 schematically illustrate the electronic screen suitable...

...at

area 382 which, when activated, will submit the award and lender selections to the **financial aid** office of the **school** (step 298A, Fig. 217). It is noted that the **student** /parent 50 may invoke the cost projection calculator 220 (Fig. 2D) to obtain more information for a better decision as to whether to approve the **financial aid** award package prior to submitting the award. If the package is accepted at step 298A...the log-out procedure (step 296D).

Once the award package has been submitted to the **financial aid** office of the institution, the **student** /parent no longer will be able to change the package in any way. The **student** will need to contact the **financial aid** office if the **student** has any further questions or issues concerning their decision.

- 25 After submitting the package to the **financial aid** office, the **student** will preferably receive a congratulatory message acknowledging the act-ion. An example of such a...

...and 3F 1 and have been previously described. Fig. 3L shows that after submitting the **financial aid** package, a **student** can return to the site in order to be able to review the package and access information. Fig. 3L shows an example of a screen presented. A **student** may view the award package by selecting the appropriate icon, in which case, the award...

...a new

method and apparatus for providing students and parents with education financing information, particularly **financial aid** award packages, where the **student** /parent can: (i) easily review the **financial aid** award package; (ii) review cost projections (e.g., loan repayment information); (iii) view and select potential lenders; (iv) modify a **financial aid** award package to include, for example, other sources of funds outside the award or to...Each batch preferably represents a number of records, one record for each potential student containing **financial aid** award and merit

based award information for that **student**. Optionally, a file name may be

provided for each batch. More importantly, the status of...particular, the electronic screen preferably includes a list of the loans available for funding

the **financial aid** award packages of the **educational institution**, namely,

Perkins loans, subsidized Stafford loans, unsubsidized Stafford loans, additional unsubsidized Stafford loans, PLUS loans...which contain information concerning the customization of information provided to the potential students in the **financial aid** award package. In particular, it is preferred that the electronic screens include input fields operable...

...text (step 437); (v) congratulations text (step 438); (vi) decide later text (step 439); (vii) **financial aid** policies (step 440); (viii) **financial aid** eligibility requirements (step 441); and (ix) sell copy for **school** (step 442).

In order to facilitate a change in any one or more of the...to the school administrator 60 for presenting an electronic screen which contains a list of

financial aid award packages which have been sent to specific **students**

meeting the search criteria. Fig. 512 shows such a list. Fig. 513 shows a detail page when a **student** from the list has been selected.

Fig. 513 shows a sample of a student detail...

...The administrator selects and activates a particular icon to select an option.

When a particular **financial aid** award package is selected from a list, data is preferably sent to the **school** administrator 60 for presenting an electronic screen which contains icons which, when activated, invoke certain functions, namely, viewing the award package (step 446), inputting a **student** - 34 response (i.e., acting on behalf of a **student**) at step 447, and viewing the package history (step 448). After the **school** administrator 60 has viewed the award package, acted on behalf of a **student** and/or viewed the package histories, the process control preferably returns to step 402 (Fig...

...an area 528 having one or more input fields operable to receive criteria concerning the **financial aid** award packages sent to potential **students**. The criteria is selected by the **school** administrator 60 in a way which will produce a useful search result. In particular, a search may be performed on the status of a **student**'s action related to an award package, for example: (i) all **students**; (ii) **students** who have accepted; (iii) **students** who have declined; (iv) **students** who have received their packages but have not decided; (v) **students** whose records have been disabled by the **school** administrator 60; or (vi) **students** who have not visited or received their packages. See Fig. 5JI. The search criteria may...

...order of the resulting search may also be controlled, for example, by sorting based on **student** ID, **student** last name and action date. Fig. 5J2 shows a sample screen presenting report results.

Once...

...sent to the school administrator 60 for presenting an electronic screen containing a list of **financial aid** award packages which meet the criteria. At step 454, if the **school** administrator 60 wishes to view another report, then the process control returns to step 450 and the **school** administrator 60 is prompted to enter another set of criteria.

The reporting menu provides the...

...method and system is operable to: (i) reduce the costs for a school to transmit **financial aid** award packages to potential **students**; (ii) quickly modify the **financial aid** award packages based on accept/decline/postpone decisions of the **students** /parents; and (iii) provide - 36 influence on the **student** /parent decision at the time of reviewing the award package.

Reference is now made to...electronic screen includes a list of potential awards 708 which may be included in a **financial aid** award package and a list of awards offered by a particular **school** 710. Using icons 712

and 713, the system administrator 70 may advantageously add...

...step 618), respectively, awards to and from the list of awards offered by a particular **school** in the list. When the list of awards offered by the **school** has been modified, the system administrator 70 may submit (step 619) the revised list by...

...the profile of a school that is a user of the system. In particular, a **financial aid** award may be added at step 632, viewed at step 634 and/or deleted at...

...carried out using suitable electronic screens. Preferably, the system administrator does not have access to **student** award packages.

When the system administrator 70 selects the "add/modify/delete lender" icon (Fig...

Detailed Description

Detailed Description
... the medium for educational
purposes.

Further, access, presentation, and aggregation of information contained in existing **networks** are provided from the institution's perspective and not an **individual** student's perspective. Typically, a **student** must access different locations or **web** pages of an institution's **network** for each datum she wishes to inspect. Further, a **student** may have to log-on to multiple **networks** in order to access different items of data. For example, a **student** may wish to view his **financial aid** status before registering for an upcoming course or semester. In existing **networks**, the **student** will have to traverse multiple **web** pages and possibly log-on to multiple **networks** in order to access his current **financial aid** status, assess that information, and then register **online** taking into account his particular information. Many similar situations are commonplace involving access to grading information, class schedule,

4
exam materials, **student** group meetings, and other such information. Existing systems, in short, aggregate course, institution, and **student** information in an institution centric manner. This imposes a time cost upon each **student** /user of the existing systems in order to reduce complexity from the institution's implementation and maintenance perspectives. However, given that these time costs are imposed on all **students**, the sum of these distributed costs outweigh the cost savings realized by the institution in...based systems, including proprietary institutional electronic networks and systems related to grades, registration, course schedules, **financial aid**, etc. without requiring modifications to existing systems or security procedures.

In a presently preferred embodiment...

Detailed Description

Detailed Description

... and increased flexibility in defining terms of the account.

BACKGROUND OF THE INVENTION

Practically no **individual** can escape from being associated with an account of some type. More likely than not, an **individual** does not have a single account but has accumulated a great number of accounts with various companies. An **individual**, for instance, may have accounts with a local exchange carrier, a long distance provider, an **Internet** service provider, a wireless phone carrier, an electric company, a natural gas provider, a **financial aid** company, one or more credit card companies, retailer credit cards, automobile financiers, and a mortgage company. Of course, **individuals** are not the only entity to have accounts since companies also have accounts with other companies and also must maintain accounts with **individuals** and/or other companies. Financial accounts are therefore ubiquitous.

Managing accounts held by a company...

Detailed Description

Detailed Description

... may be applicable to all institutions within a region but not to other institutions.

Some **applicant** attributes are applicable only to institutions in a particular **school** system. **Individual** pieces of information can also be grouped and properties can be specified for the groups...

...can also include information that designates the routing of the information to groups, such as **financial aid** officers, within the institution.

The invention not only allows an application to be customized for... Institutions Table to determine access to particular attributes in applications. For I 0 example, a **financial aid** officer in the medical **school** of a **university** may have access only to financial information on the medical **school** application, whereas a **financial aid** officer of the **university** or of the **university** system may have access to financial information on all applications. Thus, the invention permits flexible...YN" VALUE="" SIZE=5 MAXLENGTH=10>

Loan application generation system e.g. for educational loan
application, generates loan application by selecting loan processing
partners based on borrower 's responses to partner's question set

Patent Assignee: GLOBAL STUDENT LOAN CORP (GLOB-N)

Inventor: HARKOLA S; JEPSEN K J

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Date	Applicat No	Kind	Date	Week
US 20040088246	A1	20040506	US 2002288198	A	20021105	200436 B

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
US 20040088246	A1	11	G06F-017/60	

Abstract (Basic): US 20040088246 A1

NOVELTY - A processor receives and presents multiple question sets defined by multiple loan processing partners, to **borrower** . The processor generates a loan application for the **borrower** , by selecting partners based on **borrower** 's responses to the question sets, such that the application includes at least one question defined by the selected partner.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for loan application generation method.

USE - For generating **educational** loan applications, credit card applications, consumer loan applications, **school** admission applications, employment applications, other loan applications such as mortgage lending, vehicle lending, etc. for loan processing partners such as **school** , lender, guarantor, credit card company, bank and employer, using user interfaces such as computer system including work stations, laptops, notebook computers, personal digital assistants (PDAs), cell phones, beepers, or other communication equipment using wireless application protocol (WAP) and **web** interfaces.

ADVANTAGE - Enables multiple **borrowers** to receive disbursed loan amounts according to their requirement easily through an interactive **online** environment that also facilitates loan processing partners to set specific criteria for loan approval.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the loan application generation system.

Abstract (Basic): WO 200425538 A1

NOVELTY - The system has a product access **Web** site (104) linked to a server through a computer **network** and provides a user interface through which a user e.g. **student** selects from a set of **financial aid** products. A sign-on module (103) interacts with the site to control access to the products. The module provides access to any product after receiving valid login information a single time until the user is logged out of the system.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) a computer software program product for **financial aid** embodied on a computer usable medium

(b) a method of providing for educational **financial aid** service.

USE - Used for providing access to educational and **financial aid** product to consumer e.g. **student** and his/her family via World Wide **Web** of an **Internet** from an **educational institution** e.g. **school** , **college** and **university** , and a financial institution.

ADVANTAGE - The system enables the **student** to complete his/her **student** loan process and access **financial aid** and other products from a central location via the **Internet** to meet his/her **financial aid** needs efficiently and conveniently.

DESCRIPTION OF DRAWING(S) - The drawing shows a block diagram illustrating a system for providing educational **financial aid** services.

Abstract (Basic): US 20040044616 A1

NOVELTY - The program includes instruction for making arrangements for payment on loans of employee of an organization by consolidating loans using centralized agency such as **school** loans corporation (SLC). The payment on loans are automatically performed from the funds of the organization using SLC, after making arrangements.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for loan repayment system.

USE - For repayment of loans such as **student** loans including federal loans, private loans and other **educational** loans , for employees of an organization.

ADVANTAGE - The **student** loan payment is offset by making consolidating loans of employee of an organization using SLC.

DESCRIPTION OF DRAWING(S) - The figure shows a form listing employees participating loan consolidation and/loan repayment.

Abstract (Basic): JP 2004005552 A

NOVELTY - An application server (11) display selection menus related to housing and **educational loans**, old age fund design, asset management design and inheritance design to registered customer, after confirming customer's identification (ID) code and password. The server performs simulation of fund management, based on financial plan and customer's sub-items selection.

USE - For simulating financial project aid such as housing loan, **education loan**, and old age fund design, asset management design, inheritance design, tax plan, insurance plan, life plan and pension plan using **internet**.

ADVANTAGE - The simulation result is efficiently notified to the customer, as per the requirement for all sorts of financial plans desired by the customers.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the financial project aid simulation system.

Abstract (Basic): US 20030219710 A1

NOVELTY - A community center comprising web pages of general
interest, is provided to all members of knowledge community. The
opportunities comprising web pages through which the member initiates
activities, are provided to the member of knowledge community, to
participate in development of the knowledge community.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the
following:

- (1) academic service providing system; and
- (2) recorded medium storing academic service provision program.

USE - For providing academic service of high education
institutions , through computer networks .

ADVANTAGE - Enables administrators to monitor and report member
participation. Facilitates direct communication between members and
academic institution. Fosters the co-production and retention of social
and intellectual capital, through information resource and interactive
relationship.

DESCRIPTION OF DRAWING(S) - The figure shows a flow diagram
illustrating academic service providing model.

US 20030093346	A1	19	G06F-017/60	

Abstract (Basic): US 20030093346 A1

NOVELTY - The amount of **financial aid** available to each **student** is estimated and personal information of each **student** is collected. The eligibility of **student** with respect to each type of **financial aid** is decided by a processor (22), based on the collected

information. A report indicating the selected **students** and their respective **financial aid** packages is generated by a reporting unit (28).

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (1) **web** -based application;
- (2) automated **financial aid** provision method; and
- (3) automated **financial aid** application processing method.

USE - For automated and **online financial aid** management related to educational services through **Internet**.

ADVANTAGE - Simplifies decision making, due to interactive and simultaneous access among different persons at a time. Reduces total processing time, by avoiding the need for personal visits or classifications and other direct manual assistance from financial entities.

DESCRIPTION OF DRAWING(S) - The figure shows an explanatory diagram indicating virtual **financial aid** system.

Abstract (Basic): US 20030056113 A1

NOVELTY - An input unit receives the identification information associated with the desired entity. An identify transaction engine permits the entity to engage in the regulated transaction based on the analysis of the identification information, attribute to regulated transaction and the information stored in the data stores.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

- (1) regulated transaction authorization system;
- (2) regulated transaction method; and
- (3) data packet.

USE - For validating regulated transactions such a purchasing of alcohol and tobacco products, voting, driving in restricted area, renting of vehicle, purchasing of firearm, boarding of aircraft, requesting **financial aid** for **college** tuition, sending letter, shipping package, purchasing ticket, boarding a mode of transport, obtaining employment, retaining employment, engaging financial transaction, obtaining permission to institution and permission to enter a country, obtaining license, obtaining identification document and granting work authorization.

ADVANTAGE - Effectively performs identity validation for regulated transactions.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart of validation identification process of a regulated transaction.

Abstract (Basic): JP 2003044670 A

NOVELTY - A calculating unit in the server computer (100) designs

loan for the user, based on user's life plan information obtained from the user computer (200) and the required loan design information. A transceiver of the server transmits the loan design result to the user computer through the **Internet**.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) loan design apparatus;
- (2) loan design method;
- (3) loan design program; and
- (4) loan.

USE - For loan designing e.g. for housing loan, reform loan, motor-vehicle loan and **education loan** using **Internet**.

ADVANTAGE - Provides payment fluctuation either monthly or annually according to user's income and allows repayment using simple technique.

DESCRIPTION OF DRAWING(S) - The figure shows an explanatory view of the loan design system. (Drawing includes non-English language text).

US 20020120538	A1		95	G06F-017/60	Provisional application US 2001267142

Abstract (Basic): US 20020120538 A1

NOVELTY - An integration unit provides real-time integration between a grants management system and a financial management system so that the grant management system dynamically manages the grant initiative transactions and financial transactions associated with a life-cycle of a grant initiative, by automatically triggering events.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) Multi-channel grant management method;

- (2) Grant initiative agreement closing method;
- (3) Computer readable storage medium storing multi-channel grant management program; and
- (4) Computer readable medium storing grant initiative agreement closing program.

USE - For managing grants in electronic commerce application, also for managing **financial aid** loans, housing lotteries for providing grants such as scholarships, state or federal loans to **college students**, etc.

ADVANTAGE - By integrating the grant and financial management system, transmission and messaging between grants and financial management systems are facilitated. By dynamically managing grant initiative transactions and financial transactions, the granting agency reviews all the applications for a particular grant so that best qualified **applicant** is determined efficiently, hence increases grantee satisfaction and reduces administration overhead.

DESCRIPTION OF DRAWING(S) - The figure shows a system architecture of the multi-channel grant management system.

Abstract (Basic): US 20020055851 A1

NOVELTY - A **network** of certified product dealers are provided.

The **individuals** such as military service men are educated about personal finances and budgeting principles. **Financial aid** is provided through an installment loan program from an approved **network** of financial institutions. The **individual** is assured of obtaining the system guidance and service availability for purchasing the financed product.

USE - For facilitating purchase of financed product such as

vehicle, by **individuals** such as military service men.

ADVANTAGE - The **individuals** are assured of the purchase handled, based on the downplay and use of loan proceeds that suits the various criteria established earlier.

DESCRIPTION OF DRAWING(S) - The figure shows a flowchart of financed product purchase facilitating method.

AU 200188756 A G06F-017/60 Based on patent WO 200221385

Abstract (Basic): WO 200221385 A1

NOVELTY - Bidders response proposals are received at a **web** site of a global computer **network** , based on the request for proposal posted by an auctioneer on the site. The auctioneer is enabled to evaluate the response proposals and select qualifying bidders for a second bidding round. The processes are repeated based on the auctioneer's choice to continue auctioning award winning bidders are selected and notified.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the

following:

- (a) **Online** auction conducting system;
- (b) Lenders selection method;
- (c) Loan port-folio and forward purchase commitment auctioning method

USE - For e-commerce environment in which higher **education institutions**, lenders and loan buyers communicate and auction to conduct business such as provision of **educational loans** etc., and to provide services such as debt counseling, exit (loan repayment) counseling, repayment planning service, etc.

ADVANTAGE - Creates a dynamic, responsive marketplace that facilitates swift, secure and efficient transaction between the auction participants by using a multi-round auction method. Provides an e-commerce platform for business-to-business marketing of federally guaranteed and private **education loans** at low acquisition cost.

DESCRIPTION OF DRAWING(S) - The figure shows a flowchart explaining the method of conducting an **online** auction.

AU 200062328 A G06F-017/00 Based on patent WO 200108030

Abstract (Basic): WO 200108030 A2

NOVELTY - The method involves sending data to a user over a **network** when requested for presenting at least one electronic screen which contains cost projection information. The cost projection information is a function of the award and including an amount of money required for the **student** to attend the **educational institution**.

DETAILED DESCRIPTION - The method also involves sending data to a user over the **network** for presenting at least one electronic screen which contains financial award information concerning a potential **student** of an **educational institution**. The financial award information includes a monetary award which may be used by the **student** to attend the **educational institution**. An INDEPENDENT CLAIM is also included for an apparatus for providing a user with education financing information.

USE - Used for providing a user, such as a **students** and parents, with education financing information.

ADVANTAGE - Provides users with education financing information where the user can easily review the **financial aid** award package and the cost projection. Enables the user to view and select potential lenders. Enables users to modify a **financial aid** award package to include other sources of funds. Reduces costs for a **school** to transmit **financial aid** award packages to potential **students**. Enables quick modification of the **financial aid** award packages based on decisions of the user.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the system architecture of the apparatus for providing a user with education financing information.

EP 1228458 A2 E G06F-017/60 Based on patent WO 200054200

Designated States (Regional): AT BE CH CY DE DK ES FI FR GB GR IE IT LI LU MC NL PT SE

Abstract (Basic): WO 200054200 A2

NOVELTY - The accounts transactions are converted into messages, and are assigned priority for posting. The messages comprising authorization request are processed first by system resources and the transactions are posted to the accounts. The posting of transaction is interposed with processing of messages in real-time manner.

USE - For e.g. credit card accounts used by **individual** having accounts with local exchange carrier, long distance provider, **internet** service provider, wireless phone carrier, electric company, natural gas provider, **financial aid** company, credit card company, automobile financiers and mortgage company.

ADVANTAGE - Since the transactions are posted after processing it, in real time manner, the balances are updated continuously. The batch processing is avoided and provides parameter based approach, thus accounts managing efficiency is improved.

DESCRIPTION OF DRAWING(S) - The figure shows the flow chart explaining accounts transaction managing method.

Abstract (Basic): US 5978495 A

NOVELTY - Human finger is conditioned by contacting it with a solid lubricant dispenser consisting of oil impregnated porous material (102) that releases limited amount of lubricant with fragrance and disinfectant on finger surface containing unique identifying characteristic. The finger image of lubricated finger is captured and processed to identify human being using computer (106).

DETAILED DESCRIPTION - Three fingerprint images of the same **person** are sampled with electronic scanner at three predefined intervals. Relative changes in the images are inspected, to determine whether sufficient portion of finger is present in the field of view of scanner and the finger contact area with scanner is stationary. The position of finger is monitored on scanner to determine whether the finger is placed too high or low on scanner and to instruct the **person** using audio and visual feedback to adjust the finger position up or down or sideways on scanner. INDEPENDENT CLAIMS are also included for the following:

(a) method for improving the quality of fingerprint image from dry chapped dirty finger of human being;

(b) fingerprint image quality improving apparatus

USE - For access control, personal identification, for **financial aid** recipients, criminal identification, ID verification, time attendance application, intrusion control, positive verification for financial transactions.

ADVANTAGE - Conditioning of finger is performed with lubricant which deodorizes the finger with pleasant sent and disinfects the finger and scanner after each use thereby making the device contamination free and safe to use. Negligible false acceptance probability at very low false rejection rate is guaranteed by providing integrated interface to measure the position and quality of fingerprint image and use visual feedback on the display and audio feedback through a speaker to notify the human being to adjust the finger position on scanner when the finger is not properly placed and to repeat the lubrication process if needed.

DESCRIPTION OF DRAWING(S) - The figure shows the schematic perspective view of superior quality fingerprint image of dry chapped abraded or worn out finger.

Oil impregnated porous material (102)

Abstract (Basic): GB 2295256 A

A server is coupled with a client via a communication **network** .
The client inputs and sends a service identifier to the server,
receives a program to execute the service from the server, inputs
secret data as client controlled data from an input device and sends a
server control data request to the server, and then receives the
requested data from the server. The input data is irreversibly
processed by use of the program and received data such that the client
sends results of the process to an expert on the server side to receive
an advice of the expert.

By referring to the advice, the service user inputs evaluation of
the output results. The steps beginning at the data request input are
repeatedly conducted until the evaluation becomes satisfactory,
transmitting the process results to the server.

ADVANTAGE - E.g. for virtual trying-on of clothing in CATV
shopping. User of services can utilise highly value-added service
employing secret data of user without presenting data to service
provider side.
